- DentalPRO Mono Filtration System (Optional)
- DentalPRO 400 Filtration System (Optional)
- Internal LED strip light
- Removable collection tray

DESCRIPTION

The Bofa DentalPRO Xtract 100 is an extraction cabinet designed to effectively remove the potential harmful dust and fumes generated during dental hand finishing or monomer mixing applications.

This unit is ideally suited to manual bench top applications and provides technicians with a well lit enclosure, giving them the flexibility to work without restriction in the knowledge that dust particles and fumes are being effectively removed to maintain a safe work environment.

This system combines maximum technician protection in a small footprint with scalable and flexible options.
