# BOFA DENTALPRO XTRACT 200 EXTRACTION ENCLOSURE

## DESCRIPTION

Bofa's DentalPRO Xtract 200 dust and fume extraction cabinet is designed for the effective removal of potentially harmful dust and fumes generated during dental hand finishing or Monomer mixing applications.

This unit is ideally suited to manual bench top applications and provides technicians the flexibility to work without restriction in the knowledge that dust particles and fumes are being effectively removed to maintain a safe working environment.

This system combines maximum technician protection in a small footprint, with scalable and flexible options.

## XTRACT 200 FILTRATION PROCESS
