

DUSTCONTROL DCF 60 PRE SEPARATOR

TECHNICAL SPECIFICATION

Dimensions (L x W x H)	380 x 380 x 1125 mm
Brut Volume	60 litres
Net Volume	50 litres
Weight	9.6 kg
Inlet Outlet	Ø50 mm Ø60 mm Fits coupling sockets 2701/2708

FEATURES

- Especially suited for parquet grinding
- High speed cyclone
- For an easy transport the lock can be reversed and put into the container
- Robust steel container
- Can be connected to our dust extractors DC 1800 eco, DC 2900a/c eco and DC 3900a/c eco

DESCRIPTION

The Dustcontrol DCF 60 Pre Separator can handle large quantities of dust, especially in the case of parquet grinding.

Due to its large inlet the preseparator is also well suited to separate coarse dirt. Because 90% of the dust is already separated in the DCF 60, the number of emptying trips is reduced considerably for the user.

The DCF 60 can be connected to our dust extractors DC 1800a/c eco, DC 2900a/c and DC 3900a/c eco. For optimal usage the DCF 60 can also be equipped with our tear-resistant plastic sacks (Part No. 42285).

PART CODE

DCF 60 Pre Separator	7069
