

## NEDERMAN TRIANGULAR NOZZLE WITH SPRING-LOADED LID

### DESCRIPTION

The Nederman Triangular Nozzle with Spring-Loaded Lid for Cars closes upon release from the exhaust, this ensures that no excess fumes can escape from the extraction system.

Features an opening for a CO Probe.

The nozzle clamps to the exhaust using a secure fix system. The rubber exterior of the nozzle reduces the chance of scratches being left on bodywork.

Available Ø75, Ø100, Ø125 mm hose connection.

### OPERATION

The Nozzle is capable of fitting on top nozzles of many sizes and secured with a vice grip.

The flap is open upon use, and when disengaged from the system will close.

**AES can supply hose reels, channel ducting and other extraction options to suit the nozzle.**

### TECHNICAL SPECIFICATION

Part No.	Description	Exhaust	Hose Connection
20803461	75mm Rubber nozzle, triangular, Spring-loaded lid, wire guard and opening for CO probe	Ø75mm Single, 100 x 75mm Double	Ø75mm
