DESCRIPTION

A security cabinet, designed specifically to comply with CHIP and CLP (classification, label, packaging) regulations regarding hazardous substances, this COSHH (Control of Substances Hazardous to Health) cabinet is ideal for storing all hazardous or potentially dangerous materials.

This cabinet is built to last, with steel door thickeners, a leak proof base, and 1.5mm thick doors and walls. Can hold materials of various sizes and weights, though very heavy materials should always be placed on the bottom of the cabinet for safety. Ideal for holding paints, chemicals, solvents, or other hazardous materials, this is the cabinet that all facilities using these substances need. In addition to being sturdy, this cabinet is also safe. It features a three point locking system and a master keyed lock that comes with two keys.

FEATURES

- Conforms to Health & Safety Executive Guide HSG51 and DSEAR 2002
- High quality re-inforced steel construction
- Welded leak-proof base sump
- Latest GHS labelling supplied
- 2 point locking doors
- Mastered locks supplied with 2 keys
- 14 Size options available
