SLOPED TOP HAZARDOUS SUBSTANCE STORAGE CHEST

DESCRIPTION

Designed specifically to comply with CHIP and CLP (classification, label, packaging) regulations regarding hazardous substances, this COSHH (Control of Substances Hazardous to Health) cabinet is ideal for storing all hazardous or potentially dangerous materials.

This chest is built to last, with steel door thickeners, a leak proof base, and 1.2mm thick doors and walls. With one adjustable shelf, this cabinet can hold materials of various sizes and weights, though very heavy materials should always be placed on the bottom of the cabinet for safety.

Ideal for holding paints, chemicals, solvents, or other hazardous materials, this is the chest that all facilities using these substances need. In addition to being sturdy, this chest is also safe. It features a padlock security post.

TECHNICAL SPECIFICATION

Dimensions (L x D x H)	609 x 330 x 660mm / 1168 x 457 x 762mm
Application	Hazardous Substance Storage
Sump Capacity	15/35 Litre
