

# EXTENDABLE VERTICAL STORAGE RACK WITH CHAINS

## TECHNICAL SPECIFICATION

Number of Compartments	4 (Expandable via additional sections)
Construction	Fully Welded Steel
Dimensions	1350(L) x 600(D) x 1500(H) mm
Compartment Dimensions	250(L) x 600(D) mm
Finish	Blue Epoxy Paint

## DESCRIPTION

Extendable vertical pipe racking unit. Each bay features a welded labelling area and a retaining chain to enclose the contents. The racking units can be secured using the multi position brackets and included floor anchors. The modular design of the racking-system allows unlimited extensions of racking: simply build base unit and add required number of extensions. An economical and adaptable system for the safe storage of piping, bars and long pieces of steel and timber.

## FEATURES

- British Manufactured
- Fully welded steel construction, with steel base
- 4 storage compartments 600 x 250 mm
- Pre-drilled for bolting to the floor (fixings not included)
- Comes with epoxy paint finish
- Ideal for storing multiple metal bars in various heights
