

# BAILEIGH DRILL PRESS - GEAR DRIVEN DP-1500G

## TECHNICAL SPECIFICATION

Item Number	DP-1500G
Table Dimensions	508mm x 406mm
Motor	2.2 kw
Spindle Speed	90-1500 RPM
Spindle Taper	MT 4
Tapping Capacity	M18 / M32
Power	400V
Shipping Weight	310 kg
Feed Speed	0.1, 0.16, 0.24, 0.33
Drill Capacity	38mm
Spindle Travel	190mm
Base Dimensions	495 x 711mm
Shipping Dimensions	2134 x 584 x 940mm

## DESCRIPTION

A Baileigh Industrial DP-1500G gear driven drill press is rigidly designed for heavy drilling. The column is a massive 5.5" diameter to help reduce possible flexing during heavy feeds at maximum capacity, which is 1.5" through mild steel. The base and table are made from a heavy casting and both have large T-slots to ensure a proper hold of the material being drilled.

The DP-1500G has a heavy, industrial-grade gear system that allows for an array of speeds to work with many different materials for drilling and tapping. To properly transfer the power from the gear head drill press to the material the drill uses a #4 morse taper. The DP-1500G comes with a coolant system, safety guarding, a chuck and a halogen light.

This Baileigh Industrial drill press offers a lot of power at a very economical value to the machine shop or fabrication shop owner.

## FEATURES

- Variable Speed
- Halogen Working Light
- T-Slots For Holding Working Item
- 1.5" Steel Maximum Capacity
