

BAILEIGH DRILL PRESS - VARIABLE SPEED DP-1000VS

TECHNICAL SPECIFICATION

Item Number	DP-1000VS
Motor	1.5kW
Quill Diameter	62mm
Spindle Nose To Table	605mm
Spindle Nose To Base	1150mm
Spindle Speed	185-2500 rpm
Spindle Taper	MT 3
Table Slot	16mm
Tapping Capacity Steel	16mm
Motor Coolant	0.125kW
Drill Capacity Steel	25mm
Power	220V / 1-Phase
Shipping Weight	263kg
Swing	530mm
Spindle Travel	100mm
Column Diameter	92mm
Base Dimensions	685 x 485 mm
Shipping Dimensions	813 x 610 x 2007mm
Belt Table Dimensions	460 x 360mm

DESCRIPTION

The DP-1000VS variable speed drill press has a very wide column to eliminate flexing when drilling at full capacity.

The base and table are made from a very rigid casting adding to the strength of this 1" maximum capacity drilling machine.

The inverter driven head allows the machinist or fabricator to run tooling at the proper speed for each drill or tap size available.

Running at the exact speed extends tooling life, something that can't be accomplished on other drills like pulley driven styles. The DP-1000VS drill press also comes with a coolant system, safety guarding and a halogen light.

FEATURES

- Variable Speed
- Halogen Working Light
- T-Slots For Holding Working Item
- 25mm Steel Maximum Capacity
