

BAILEIGH DRILL PRESS VARIABLE SPEED DP1500VS

DESCRIPTION

Baileigh's DP-1500VS heavy-duty drill press comes with power feed and a quality auto-reversing tap feature. This is a quality made machine using only the best quality castings and base metals to ensure rigidity when drilling at maximum capacity with the power downfeed.

The base and drill table is made from a heavy casting that has oversized T-slots for secure clamping of a vice or fixture.

This variable speed drill press has an inverter-driven head of which the quill speed can be properly adjusted to each different drill size that really will extend tooling life.

Adjustments to the speed can be done by a speed potentiometer dial, noting the RPM is displayed on the digital read out.

Additional standard features of this quality floor type drill press are a safety guard with limit switch, a powerful coolant system, and a bright halogen light.

TECHNICAL SPECIFICATION

| | |
|-----------------------|-----------------------|
| Item Number | DP-1500VS |
| Table Dimensions | 560 x 470mm |
| Motor | 1.5kW |
| Quill Diameter | 75mm |
| Spindle Nose To Table | 640mm |
| Spindle Nose To Base | 1035mm |
| Spindle Speed High | 245-2000 rpm |
| Spindle Speed Low | 65-540 rpm |
| Spindle Taper | MT 4 |
| Table Slot | 16mm |
| Tapping Capacity | 25mm |
| Motor Coolant | 0.125kW |
| Drill Capacity | 45mm |
| Power | 220V / 1-Phase |
| Quill Feed | 0.1, 0.2, 0.05 mm/rev |
| Shipping Weight | 410kg |
| Spindle Travel | 150mm |
| Column Diameter | 115mm |
| Base Dimensions | 685 x 485 mm |
| Shipping Dimensions | 600 x 940 x 2130mm |

FEATURES

- Variable Speed
- Halogen Working Light
- T-Slots For Holding Working Item
- 45mm Maximum Capacity
