DESCRIPTION

The Bofa FumeCAB 700 is the complete solution for fume cabinet extraction for a broad range of applications.

Partial enclosures are becoming the recommended extraction option for a variety of applications. Governments bodies, including the HSE in the UK are now making direct reference through guidance documentation such as the HSG258 to their use.

The FumeCAB 700 integrated filtration system has been designed to ensure compliance with the latest regulations.
The innovative Cam filter change design enables safe and simple front loading filter replacement and provides many benefits over alternative rear access systems.

Ultra-bright slim line energy savings LED lights come as standard with optional UV lighting, making the FumeCAB 700 and ideal choice for applications such as the conformal coating of PCBs, where operators can now easily identify uniformity issues with the coating.
