

## HDC 155P

### DESCRIPTION

The HDC 155P is a motorised industrial vacuum cleaner with a 5.5 kW three-phase side channel turbine, configurable according to customer requirements.

With turbine in series, the HDC 155P is ideal for collecting heavy materials or for being used over long distances.

Including a parallel turbine for greater air flow. This robust vacuum cleaner is ideal for heavy duty applications.

### FEATURES

- 5.5 kW two-stage turbine with thermal protection for powerful suction capacity
- Suitable for continuous 24/7 operation with minimal maintenance, offering a long operational life.
- Industrial vacuum cleaner with cartridge filtering system - more suitable for dust suction than conventional polyester star filters.

### TECHNICAL SPECIFICATION

Type	PRO
Vacuumed Material	Dust
Motorization	Turbine
Power	5.5 kW
Voltage	400 V
Frequency	50 Hz
Amps	10.4 A
Air Flow	560 M3/H
Depression	320 mBar
Valve Depression	250 mBar
Suction Inlet	Type B Tangential - 60 mm
Dimensions	1200x600 h1350 mm
Weight	151 kg
Filter Chamber Diameter	Ø 460mm
Tank And Longopack Interchangeability	Yes
Filter Type	3X CARTRIDGE UL-PA+PTFE
Discharge System	100 Liters / Longopac®
Filtering Surface	22.000 cm2
Filter Cleaning	Semi-automatic Pneu-mechanical Shaker
Hepa Absolute Filter	-
