

## ESTA OM-12

### DESCRIPTION

OM series mini dust collectors offer multiple possible applications in dust-generating machines. They are used for almost all types of dust and feature powerful suction capacity and low operating noise. For occasional use, they are suitable for uninterrupted operation and not overly-large volumes of dust. These devices are often used in the electronics industry, surface technology and metalworking firms.

### FEATURES

- Suitable for almost all types of dust
- Flexible uses
- Low operating costs due to cleanable bag filters
- Small space requirement due to compact design
- Cleanable durable dust collection bag
- Large dust collection drawer
- Fixed extraction system which can be connected next to processing machines.
- Pressing the hand lever puts the bag filter into vibration via a built-in eccentric screw and the dirt falls away.

### SPECIAL VERSIONS

- Filter material for fine dusts, tested to dust class M
- Motor in A/C or three-phase A.C. current
- Custom paint finishes
- Water pre-separator
- Mobile frame with four castors
- Sound dampening muffler

### TECHNICAL SPECIFICATION

Voltage	400 V
Motor	1.1 kW
Intake diameter	150 mm
Max. airflow	800 m <sup>3</sup> /h
Max. neg. pressure	1800 Pa
Weight	70 kg
Dimensions (l x w x h)	610 x 740 x 1150 mm
Height of suction socket	300 mm
Overall depth	670 mm
Sound emission	72 dB(A)

### APPLICATIONS

- For extraction of low volumes of dust
- In applications such as sawing, milling, grinding, etc.
- For direct extraction in processing machines

### TYPES OF DUST

- Metal dust
- Metal shavings
- Jewellery dust

### IDEAL FOR

- Sawing, cutting, separating
- Grinding, polishing
- Machining, milling

AES OFFER INSTALLATION AND SERVICE SUPPORT FOR ALL EQUIPMENT
