

NEDERMAN CONICAL RUNNER NOZZLE FOR CARS

DIRECTION

The Nederman Conical Nozzle fits directly over the exhaust pipe tip with no clamping mechanism.

The stepped shape of the hose connection point means that the nozzle will fit a Ø75 & Ø100 mm hose connection.

With this nozzle, scratching the vehicle and the risks of damage are reduced. The relatively soft rubber nozzle is versatile for most cars and is simple to fit.

OPERATION

The Nozzle is capable of fitting both exposed exhausts and those which are covered/hidden by bumpers.

The flexible nature of the rubber allows the nozzle to be pressed onto the exhaust, allowing the pipe to be sealed and the fumes can be extracted safely.

The nozzle can be attached onto the exhaust directly and connected to a hose reel or channel duct system to achieve efficient and safe extraction.

AES can supply hose reels, channel ducting and other extraction options to suit the nozzle.

TECHNICAL SPECIFICATION

Part No.	Description	Exhaust	Hose Connection	Weight
20815261	3" Nederman Conical Rubber Nozzle	up to Ø100 mm	Ø75 or 100 mm	1 kg

Other Rubber Nozzle

20817261	Rubber Nozzle, Slips on to the exhaust pipe without locking device
