

NEDERMAN OVAL RUBBER NOZZLE WITH VICE GRIP & 60° BEND

DESCRIPTION

The oval shaped nozzle is made of robust plastic and is supplied with a vice grip to secure the nozzle to the exhaust.

Available Ø80, Ø100, Ø125, Ø150 mm hose connection.

The oval nozzle is suitable for both double and single exhaust pipes and the nature of the rubber materials minimises the risk of scratching the vehicle.

The 60° bend allows easier connection to the exhaust.

OPERATION

The Nozzle is capable of fitting on to both double and single exhausts and is secured with a vice grip.

The flexible nature of the rubber and secure vice grip connection allows the exhaust pipe to be sealed and the fumes can then be extracted safely.

The 60° increases the ease of connection of the nozzle for the operator.

AES can supply hose reels, channel ducting and other extraction options to suit the nozzle.

TECHNICAL SPECIFICATION

Hose Length	Description	Exhaust	Hose Connection	Weight
For Personal Cars
