

NEDERMAN UNIVERSAL INTERNAL EXTRACTION NOZZLE

DESCRIPTION

The Nederman Universal Exhaust Extraction Nozzle with Internal Grip expands from heights of 35mm to 70mm within the exhaust pipes.

A cowl surrounds the exhaust system, allowing exhaust fumes to be safely captured by the extraction system.

Features a Ø100 mm hose connection.

Suitable for single and dual exhausts up to 270 x 70 mm.

OPERATION

The Universal Nozzle slips inside the exhaust tip and is expanded using a hand grip. When expanded, the nozzle will remain in place. The grip system can be released using a handle mounted button.

The internal grips can also move forward, helping the user to insert them into deeper covered exhaust systems.

AES can supply hose reels, channel ducting and other extraction options to suit the nozzle.

TECHNICAL SPECIFICATION
