12	300 x 40	32	10	50
12	300 x 40	38	9	50
13	300 x 40	50	7	50

DESCRIPTION

The HVU hose reel is a robust and easy to use hose reel for use in high vacuum systems.

The hose reel has a number of characteristics that make it practical and user-friendly.

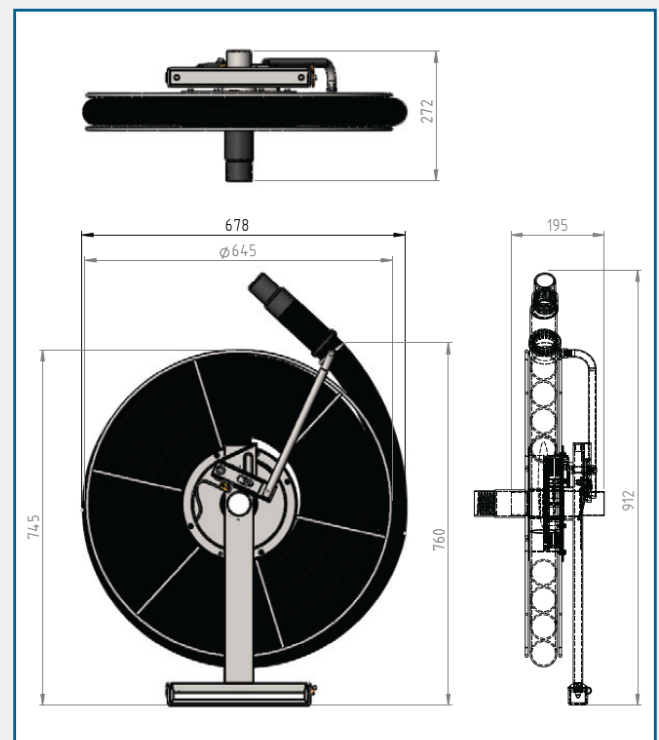

After use, the hose is automatically rolled back onto the hose reel, saving time and hassle in handling it.

The hose stop is easy to adjust and allows the user to select the optimum length of hose based on the individual task.

The hose reel has a micro switch fitted, so that the pressure in the hose is automatically activated when the hose is unrolled.

The hose reel is designed for easy installation. It is made of painted steel and the hose is anti-static and made of polyethylene and elastomer.
