

OIL 300 T4P LINE VACUUM CLEANER

TECHNICAL SPECIFICATION

Type	Oil
Vacuumed Material	Oil and metal shavings
Motorization	Turbine
Power	4 kW
Voltage	400 V
Frequency	50 / 60 Hz
Amps	8.9 A
Air Flow	320 m3/h - 50 Hz
Depression	320 mBar - 50 Hz
Valve Depression	320 mBar
Suction Inlet	Type B - 60 mm
Dimensions	1400x800 h1850 mm
Weight	283 kg
Filter Chamber Diameter	Ø 460 mm
Filter Type	Cartridge M Class Hydro-Oleophobe
Filtering Surface	-
Filter Cleaning	-
First Filtration Stage	Oleophobic Sponge
Liquids Capacity	300 Liters to the level 400 liters tank volume
Solids Capacity	75 Liters and tilting hopper
Oil Filtration Grade	Nylon 300 µ
Electric Floater	YES Automatic shut OFF
Discharge System	Electric PUMP 140 LT / min

DESCRIPTION

The OIL 300 is a high-capacity industrial vacuum designed to collect oil and swarf. Equipped with a 300 litre tank and a stainless steel grid basket, it ensures efficient solid-liquid separation with additional filtration through a 300µm nylon filter.

Liquid emptying is fast and continuous thanks to the integrated centrifugal pump, delivering 140 litres per minute, protected within the vacuum structure.

The automatic stop system halts suction when the maximum liquid level is reached. Ideal for intensive applications, it also offers versatility for general cleaning tasks with an optional dust filter.

FEATURES

- 300 litres net liquids volume and 75 litres solids capacity.
- Easy tilting hopper emptying system for swarf and chips.
- Submersible pump with double float: the pump can work simultaneously with the suction.
