

BINZEL XFUME VAC ADVANCED EXTRACTION UNIT

TECHNICAL SPECIFICATION

Dimensions	700 x 700 x 1000 mm
Voltage	115 - 230 V - 50/60 Hz
Power Consumption	2 x 0.8 kW
Max. Negative Pressure	20.000 PA
Max. Airflow	340 m ³ /h
Cleaning	Automatic
Weight	35 kg
Connection Diameter	60 mm
Filter Efficiency	99.99%
Sound Level	< 68 dB(A)

FEATURES

- Powerful fume extraction technology: more than 20.000 PA negative pressure
- 100% automated filter cleaning
- Filters out up to 99.9% of all dusts > 0.1 m
- Reduces operating costs and wear thanks to automatic start/stop - optionally via current clamp
- Small, robust size with castors for maximum mobility

DESCRIPTION

The Binzel XFume Vac Advanced is a mobile extraction system which can be combined with the Binzel fume extraction torches (RAB GRIP & RAB GRIP HE).

The cleaning of the collected fume particles is 100 % automated thanks to a regular compressed air pulse that ensures that all collected small particles are blown out and collected in a dust collection container. This is easily emptied in daily standard operation, eliminating maintenance downtimes.

The filter is cleaned automatically by compressed air impulse. The unit is equipped with 4 robust castors, for a high mobility.

Fume extraction torches from other manufacturers can likewise connect to the xFume Vac Advanced.

BINZEL WELDING TORCHES

Welding Torch	Part. Code
RAB GRIP 25 HD BBH	604.0130.1 604.0131.1 604.0132.1
