

## BINZEL XFUME VAC ADVANCED + RAB GRIP 255 TORCH

### TECHNICAL SPECIFICATION

Dimensions	700 x 700 x 1000 mm
Voltage	115 - 230 V - 50/60 Hz
Power Consumption	2 x 08 kW
Max. Negative Pressure	20.000 PA
Max. Airflow	340 m <sup>3</sup> /h
Cleaning	Automatic
Weight	35 kg
Connection Diameter	60 mm
Filter Efficiency	99.99%
Sound Level	< 68 Db(A)

### DESCRIPTION

The Binzel xFume Vac Advanced is a mobile extraction system which can be combined with the Binzel fume extraction torches.

The cleaning of the collected fume particles is 100% automated thanks to a regular compressed air pulse that ensures that all collected small particles are blown out and collected in a dust collection container. This is easily emptied in daily standard operation, eliminating maintenance downtimes.

The filter is cleaned automatically by compressed air impulse. The unit is equipped with 4 robust castors, for a high mobility.

Fume extraction torches from other manufacturers can likewise connect to the xFume Vac Advanced.

### FEATURES

- Powerful fume extraction technology: more than 20.000 PA negative pressure
- Compressed air connection for 100% automated filter cleaning
- Filters out up to 99.9% of all dusts > 0.1 m
- Reduces operating costs and wear thanks to automatic start/stop - optionally via current clamp
- Small, robust size with castors for maximum mobility
- Torch RAB Grip 255 LW BBH + 5M Hose - Air Cooled
- Control panel
- Connection extraction hose
- Dust collector drawer
